

KARANDEEP SINGH

Product Manager | AI & Growth | 0-to-1 Products

+91 8851260093 ◇ karandeep0998@gmail.com ◇ New Delhi, India ◇ [Linkedin](#) ◇ [Portfolio](#)

SUMMARY

AI Product Manager with 5 years across frontend engineering and 0-to-1 AI-native products. Cofounded SellerOps, where I own discovery through launch for a natural-language analytics platform serving 30+ marketplace sellers, and Zibell, the D2C brand where the seller-analytics problem found me. I build LLM features with evaluation and guardrails first, because the customer is me.

CORE SKILLS

Product Product Strategy, Roadmapping, Product Discovery, PRD, OKRs, Go-to-Market (GTM), RICE/ICE Prioritization, Stakeholder Management, Agile, Scrum

AI & Data RAG, LLM APIs (OpenAI, Anthropic), LLM-as-Judge & RAGAS Evals, AI Guardrails, Vector Databases, Text-to-SQL (NL2SQL), Prompt Engineering, SQL

Analytics & Growth A/B Testing, Funnel & Cohort Analysis, Conversion Optimization, Retention, Attribution, GA4, Mixpanel, Meta/Google Ads, Power BI

Tools & Engineering Jira, Confluence, Notion, Figma, Amplitude, React.js, JavaScript

EXPERIENCE

Co-Founder & AI Product Manager

Feb '26 — Present

[SellerOps - AI native e-commerce analytics platform for marketplace sellers](#)

India (Remote)

Spun out of Zibell's own reporting problem

- Own the end-to-end product lifecycle (discovery, PRDs, prioritization, sprint planning, launch, measurement) for a platform serving 30+ active sellers tracking INR 60L+ (~\$72K) GMV and 20K+ orders analysed.
- Reduced hallucination risk in financial insights by building an AI evaluation framework with golden datasets, LLM-as-Judge scoring, and quality thresholds.
- Cut weekly seller reporting from ~3 hours to under 30 minutes by designing a RAG-based natural-language query system grounded in verified settlement data.
- Validated product-market fit through 20+ interviews with Amazon, Flipkart, and marketplace sellers; defined product vision, roadmap, GTM strategy, and North Star Metric.
- Shipped modules across SKU profitability, returns intelligence, PPC, fees, and business health, with proactive insights that auto-surface profit leaks and anomalies.

Co-Founder & Growth Product Manager

Nov '23 — Present

[Zibell - D2C fashion & lifestyle brand](#)

New Delhi, India

Now team-operated; I own roadmap and analytics.

- Grew website conversion rate from 0.64% to 3.38% (5.3x) by rebuilding product discovery, trust signals, and checkout.
- Scaled monthly orders from 11 to 236 (21x) by pairing that conversion lift with ~4x traffic growth from paid campaigns built on GA4/Meta Pixel attribution set up from scratch.
- Built GA4 and Meta Pixel attribution plus funnel analytics from scratch (0% to 100% campaign attribution), enabling data-driven optimization across channels.
- Cut returns from ~15% to ~3.5% by diagnosing full-COD abuse and introducing partial COD, reducing courier cost leakage on both legs.
- Led roadmap, OKRs, and execution across a 5-member cross-functional team; recovered lost revenue via automated abandoned-cart flows.

Software Development Engineer (UI)

Jul '21 — Dec '23

[Mindtickle](#)

Pune, India

- Built enterprise SaaS product experiences in React.js, TypeScript, and Ant Design, partnering with PMs and designers to ship scalable solutions.
- Reduced mid-sprint ambiguity by translating product requirements into detailed technical specs and development plans.
- Improved release quality and cut UI regression risk through reusable component architecture and automated testing (Jest, Enzyme).

EDUCATION

B.Tech in Computer Science, Guru Gobind Singh Indraprastha University

Mar '17 — May '21

New Delhi, India
