SUMMARY

AI Product Manager with 4.5+ years across product management, software engineering, AI-native products, and ecommerce entrepreneurship. Co-founded SellerOps, an AI analytics platform serving 500+ marketplace sellers, and Zibell, a D2C brand scaled to 5,000+ monthly orders across multiple channels. Experienced in AI product strategy, RAG systems, product discovery, analytics, experimentation, and zero-to-one execution.

WORK EXPERIENCE

Co-Founder & AI Product Manager Feb '26 — Present
[SellerOps](#)

- Conducted 20+ customer interviews with Amazon, Flipkart, and marketplace sellers to identify key operational and profitability pain points, leading to product-market fit validation.
- Defined product vision, roadmap, GTM strategy, and North Star Metric for an AI-native ecommerce analytics platform.
- Designed RAG-based architecture enabling sellers to query business data in natural language, reducing average weekly reporting time from ~3 hours to under 30 minutes.
- Built AI evaluation framework using golden datasets, LLM-as-Judge scoring, and quality thresholds to improve response accuracy and reduce hallucination risks in financial insights.
- Designed proactive AI insight workflows that automatically surface profit leaks, return issues, and performance anomalies without requiring manual analysis.
- Owned end-to-end product lifecycle including discovery, PRDs, prioritization, sprint planning, launch, and performance measurement.
- Delivered product modules covering SKU profitability, fee analysis, returns intelligence, advertising performance, geographic insights, and business health monitoring.
- Acquired 500+ active sellers and launched modules covering SKU profitability, returns intelligence, PPC, fees, and business performance.

Co-Founder & Growth PM Nov '23 — Present
[Zibell](#) New Delhi, India

- Built and scaled a D2C apparel brand to 5,000+ monthly orders across Amazon, Flipkart, Myntra, Meesho, Snapdeal, and Shopify.
- Identified that full COD was attracting low-intent buyers driving ~15% return rates and significant courier cost leakage on both legs; introduced partial COD, bringing returns down to ~3.5%.
- Identified major funnel drop-offs through analytics and led conversion-focused product redesign initiatives.
- Built analytics infrastructure, experimentation frameworks, and performance dashboards from scratch.
- Led product roadmap, OKRs, and execution across a 5-member cross-functional team.

Software Developer Engineer (UI) Jul '21 — Dec '23
[Mindtickle](#) Pune, India

- Built enterprise SaaS product experiences using ReactJS, TypeScript, and Ant Design.
- Partnered closely with Product Managers and Designers to convert requirements into scalable product solutions.
- Translated product requirements into detailed technical specs and development plans, reducing mid-sprint ambiguity and back-and-forth with PMs.
- Modernized internal component libraries and reduced frontend maintenance overhead through reusable architecture patterns.
- Implemented automated testing using Jest and Enzyme, improving release quality and reducing UI regression risks.

SKILLS

AI & ML RAG, LLM APIs (OpenAI, Anthropic), vector DBs, evals (RAGAS, LLM-as-judge), model selection, agentic systems, LangChain, Text-to-SQL (NL2SQL), Prompt Engineering
Product Product strategy, Product discovery, User Research, Product Roadmaps, OKRs, Product requirements document (PRD), Go-to-Market Strategy, spec-driven dev, Product Lifecycle, Stakeholder Management
Analytics A/B Testing, Funnel Analysis, Cohort Analysis, Retention Analysis, NSM design, Mixpanel, SQL, Google Analytics, Power BI
Tools Figma, Whimsical, Notion, Jira, Confluence, ReactJS, TypeScript, JavaScript, APIs, System integrations

EDUCATION

B.Tech in Computer Science, Guru Gobind Singh Indraprastha University Mar '17 — May '21
New Delhi, India

- Participated in coding hackathons organised by Tech societies.

CERTIFICATIONS

Enterprise Product Management Fundamentals, Microsoft
